Training Title: Assessing and Managing Noise Exposure at Work

This training provides the knowledge and skills necessary to assess and implement an approach to prevent exposure to noise at work.

Target audience

Anyone in charge of noise preventing exposure at work.

Prerequisite:

None

Reference:	Category:	Duration:
Trainevo-092022-SST-34	Noise at work	2 days
Language(s):	Training organization:	Nb of participants (min) :
French		6

Objective(s)

Become familiar with the notion of noise and its characteristic quantities.

Understand how the ear works and the impact of associated noise.

Know the regulatory requirements in terms of exposure to noise at work.

Deploy a measurement plan to assess noise exposure at work.

Know how to use a noise measuring device.

Know how to process and exploit noise measurements.

Advise the company on collective and individual prevention measures.

Know how to write and operate an intervention report.

Program

- 1-The fundamental principles relating to the phenomenon of Noise
- 2-The effects of noise on the physiology of hearing
- 3-Issues related to noise at work and the associated regulatory framework
- 4-Deploy a noise prevention approach at work
 - 4.1-Establish a noise measurement device
 - 4.2-Noise metrology
